

## *Helping Families Grow Through Statutory Intervention*

Webinar - September 29th, 2023, 17:00 E.E.T. (16:00 C.E.T.)

Dear colleagues,

We invite you to a free webinar in English on Google Meet about the current legal responses to the demographic challenges of population and fertility decline in Romania and Central Europe. Romania has known a population decline and a fertility decrease since the 1990s. These demographic challenges have met several statutory responses, especially since 2010.

After presenting results from the *Demographic Challenges – Legal Responses* research project organized by the Central European Academy of Budapest and the Central European Professors' Network, the webinar will be open to free discussions about which of the current laws has a demographic improvement goal and what is their actual efficiency. Other discussion topics will be formulating suggestions for further legislation changes that could lead to stopping or at least diminishing the population decline.

The event is open to all lawyers, law professors or researchers interested in the subject of law and its demographic impact. In order to take part, please fill in, sign and send an e-mail with the attached data processing agreement form to [marius.floare@law.ubbcluj.ro](mailto:marius.floare@law.ubbcluj.ro) from the e-mail address where you wish to receive your participation invitation **by September 25th, 2023**. Any participants who wish to share Power Point slides at the webinar should submit them by the same deadline (September 25th, 2023) for prior approval and must agree for them to be shared with the Central European Academy in Budapest for the purposes of the *Demographic Challenges – Legal Responses* project. The webinar will also be video and audio recorded for the previously mentioned project.

The webinar will start at 17:00 Romania time (16:00 C.E.T.) and all discussions and presented slides will be exclusively in English. It will use the Google Meet platform so any participant using a tablet or smartphone must install the Google Meet app prior to joining.

*The event was organised as part of the Central European Professors' Network, coordinated by the Central European Academy.*

Professor Emese Florian, Ph.D.
